CLEANING AND MAINTENANCE

Daily cleaning of the metal frame is done by wiping the frame with a clean dry cloth, or with a cloth hardly wrung in clean water. Dirty surfaces are cleaned with a hardly wrung cloth out of soapy water or in water with added liquid soap. Wipe after with a clean dry cloth.

For cleaning the upholstered surface, first try to brush off the dirt gently. If this is not enough then vacuum the surface.

If further cleaning of the padding is needed, a stain remover is recommended. The cleaning has to be gentle and must always be tested on the most invisible area of the surface before the actual cleaning. Avoid blotches by gentle, circular rubbing towards the stain.

To avoid stains, quickly remove the dirt with a piece of absorbing household wipe and clean with water and colourless washing-up liquid.

Do not use the following products for the padding:

- Undiluted cleaning liquids.
- Bleach.
- Ammoniac.
- Soap for hard surfaces.

For further cleaning guidance, we refer to information regarding the specific textile.
