

## SKAGERAK OUTDOOR LIVING

We inspire consumers to be users. We all know that our planet is challenged by growing consumption and it's putting pressure on our resources. That's why we encourage people to prolong the lifetime of everything they use because it matters whether a piece of furniture lives for 10, 20 or 30 years.

It all starts with great design. At Skagerak by Fritz Hansen, we create quality furniture that ages with grace and lasts for generations. We care that you care, and we know that proper usage and maintenance is vital for getting the most out of the precious resources we have. That's why we created our Care & Repair site with inspiration on what our customers can do to prolong the lifetime of our designs.

We have always designed things to last a lifetime. But what happens when people change their surroundings and needs? We want to make it easy to move on without leaving good things behind. With Reclassic we give pre-loved Skagerak pieces another life by buying them back, restoring and re-selling them. And with Skagerak RENT we offer a rental service so you can experience the joys of our furniture without owning it. These initiatives are our way of respecting valuable materials and keeping them in circulation.

Skagerak is now 'Skagerak by Fritz Hansen'. Fritz Hansen stands behind Skagerak to bring the best of Danish design to every part of life, indoors and outdoors. Together the two companies will expand design possibilities with high-quality craftsmanship and beautiful design.

Josef Kaiser, CEO of Fritz Hansen and Skagerak, says, "Skagerak and Fritz Hansen are a natural fit. Both are rooted in Nordic design traditions and responsible manufacturing and synonymous with furniture and interior design of the highest quality."

Welcome to Skagerak by Fritz Hansen.

## BUSINESS AS USUAL?

Can we afford to continue business as usual? It might sound ironic, but to keep things the way they are – we have to change a lot.

Our planet is challenged by a growing population, increasing consumption and significant climate change. All of this is putting pressure on our natural resources and the reality is, that we all need to do a lot more with a lot less. We all have to consider our environmental and social impact on society equally to economic growth and profit. In fact, these elements could be each other's preconditions, not counterparts.

We have to stop our endless consumption and waste patterns – and see things for what they really are, valuable resources. Let's stop this linear thinking and start putting stuff into circulation. To design things that can be repaired, reused, rented, and regenerated. At Skagerak, we are far from perfect, but we strive to incorporate a new mindset in the way we run our business and we are inspired by the circular solutions that can shape the future of furniture.

What we do in Skagerak
In 2017, we joined the global B Corp movement – looking for new ways to use our business as a force for good. B Corps balance profit and purpose by meeting the highest standards for social and environmental performance, accountability, and transparency.

For us to join B Corp our goal is not to compete to be the best in the world - but to help each other become the best FOR the world.

We realize, that as a globally operating company, we have a great responsibility for today's development. We strive to be transparent about our efforts to minimize our negative footprint and maximize our positive contribution.

Skagerak has since 2003 been FSC<sup>TM</sup>-certified. FSC is a global non-profit organisation that ensures responsible forestry. The certificate also means that the workers never fell more trees than the forest can reproduce and the biodiversity of woods is preserved. FSC also means that the forestry workers are treated respectfully and have proper working conditions, just as FSC supports and cares for the local community.

Not only do we share the same goal of ensuring 100% certified wood by 2025, we now also share the same FSC certificate number with Fritz Hansen: FSC<sup>TM</sup> C120451 Look for our FSC-certified products in the catalogue.

Selandia Armchair – a Skagerak classic.

"AS A GLOBALLY
OPERATING COMPANY,
WE HAVE A GREAT
RESPONSIBILITY FOR
TODAY'S DEVELOPMENT.
THAT'S WHY WE FOCUS
ON MINIMIZING OUR
NEGATIVE IMPACT AND
MAXIMIZING OUR POSITIVE
CONTRIBUTION."

What has become an old classic for one person can become a Reclassic for someone else.

# PILLOWS & CUSHIONS

Skagerak's outdoor cushions and pillows are made to last – just like the furniture they are designed to accompany, adding comfort to the outdoor space. We use three types of outdoor fabric: Agora Panama/Lines, Acrisol and Sunbrella.

Agora Panama and Agora Lines are 100% solution dyed acrylic and Oeko-Tex-certified fabrics which are extremely colour- and lightfast. Furthermore, the fabrics are water, dirt, and mildew-repellent.

Acrisol is a 100% acrylic fabric, which is extremely colour- and lightfast as well as water- and dirt-repellent.

Sunbrella is an Oeko-Tex certified and 100% Sunbrella® Acrylic fabric. The fabric has world-class features for outdoor usage, making it extremely colour- and lightfast and water-repellent.

For cleaning, wipe the fabric with a firmly wrung cloth. In case of more obstinate stains, remove the upholstery and machine wash at 30° C.

The cushions all have different functions and therefore come in different shapes, textures and sizes. At Skagerak we use three types of fillings: Quickdry Outdoor Foam, Fibre Filling and Kapok.

Quickdry Outdoor Foam has an open cell structure that allows both water and air to pass through. This makes the cushion dry exceptionally quickly – even after a heavy downpour. Moreover, the foam provides a

firm and comfortable texture that remains the same year after year. We recommend placing the cushions upright for quick drainage. Soon after, the cushion will be dry and the cushion can be used again.

<u>Fibre Filling</u> consist of a lot of hollow fibres, not siliconized. The hollow fibres hold a good ability to insulate, transport moisture and provide comfort. The fibre filling inner cushions, used in Skagerak products, are Oeko-Tex certified.

<u>Kapok</u> is a natural hair-like fibre that is extremely light, water-repellent and hypoallergenic. Our kapok cushions are machine washable at 30° C and should always be tumble-dried at a low temperature to maintain their shape and prevent clumping.

Important note: Under current UK law, Skagerak is not able to provide outdoor cushions and pillows with the same filling as the regular collection. We still offer cushions and pillows in an outdoor textile with weatherproof properties, but the filling is not weatherproof due to stringent (indoor) fire regulations. We therefore recommend that you bring cushions and pillows indoors in heavy rain and when they are not in use.

## MATERIALS/ OUTDOOR

Skagerak uses quality wood. Wood that will stand the test of time and is produced under responsible terms and conditions. We mostly use FSC<sup>TM</sup>-certified wood, and work as ambassadors to help increase the number of certified woods to meet the demand. The total percentage of our certified wood is currently 93% and we are actively working towards our goal of 100% certified wood in our production by 2025. Look for our FSC-certified products in the catalogue.

Did you know that the CO<sup>2</sup> contained by wood remains in the timber, even after it has been turned into furniture and is not released into the atmosphere until it is scrapped? This means that if you keep your furniture for 50 years, the CO<sup>2</sup> is contained within the material the entire time.

<u>Teak</u> Quality teak is commonly found in South East Asia and Central and South America. Our FSC<sup>TM</sup> - certified teak comes from Brazil, Panama, Costa Rica and Indonesia. We use teak for most of our outdoor furniture, as it requires little care and maintenance. The high content of natural oils makes it highly weather- and rot-resistant – perfect for outdoor furniture you want to use all year round. If untreated, the teak develops a beautiful silver-grey patina over time.

When unpacking teak furniture, it may look slightly irregular. This is caused by the natural colour differences found in the freshly cut wood. Once the furniture has been exposed to the sun, these colour differences will even out. As a natural part of the aging process, the surface of teak will get temporarily stains and turn rough when first being exposed to rain, which will by time make the wood age with grace.

Teak is a heavy, hard and sturdy wood type but also an organic material being easily affected by temperature and humidity. Teak wood will naturally expand and contract with changes in temperature and humidity and small cracks or scratches can occur at temperature or weather changes. Remember to re-tighten the fittings from time to time.

<u>Kapur</u> This wood type is commonly found in Southeast Asia. The Skagerak Kapur comes from Indonesia and is 100% FSC<sup>TM</sup> - certified. Kapur is a strong, durable type of wood – making it the perfect choice for umbrella poles. The umbrella pole has been lacquered and the wood comes in a variety of warm colors and patinates very little as time goes by because of the treated surface.

Western Red Cedar This wood type is commonly found in western North America. Skagerak's western red cedar comes from Canada and is PEFC-certified, sourced from sustainably managed forests. Western Red Cedar is a good choice for outdoor furniture as the wood is naturally resistant to mould, decay and bacteria. As the wood ages, it develops a beautiful silver-grey patina.

<u>Powder-coated Steel</u> Steel is a strong, timeless and malleable material enabling designs with thin profiles and various patterns and shapes. To minimize corrosion, the steel is electro-galvanized with a protective layer of zinc and finally it receives a decorative powder coating – a high-quality dry finishing process that provides a stronger and more streamlined surface than conventional liquid paint.

Powder-coated Aluminum Powder coating is a high-quality dry finishing process that makes it possible to create a thicker and more streamlined surface than with conventional liquid paint. A two-layered coat is applied to the light-weight aluminum to make the material resistant to moisture, UV light, scratches and corrosion.

<u>Umbrella Fabric</u> Our durable umbrella fabric is made from either 100% spun polyester or 100% solution dyed acrylic. Polyester yarn does not wrinkle or shrink and provides a colour-fast, stain-resistant material. The fabric used in all our umbrellas is treated, which makes it water- and dirt-repellent. Be aware that the fabric is not waterproof.

Care Kit, Outdoor

1103050 Wood Cleaner by Auro 0,5 liter Brush by 'Blindes Arbejde'

Auro Garden Wood Cleaner

1103050-2 Cleaning for wood products 0,5 liter

Cura Oil, Nature

1103043 Treatment for wood products 0,5 liter

As our teak furniture is untreated, the surface will patinate over time and eventually turn into a beautiful silvery grey colour. This beautifully patinated look does not affect the durability or quality of your furniture. We recommend cleaning it at least once a year with Skagerak's Care Kit or Wood Cleaner to remove algae and dirt. If you wish to preserve or intensify the original honey-golden colour, use Skagerak's natural oil on a regular basis. No matter what you choose, the wood will be resistant to everyday wind and weather thanks to the high content of natural oils.
