

Loku

Stool

Care Instructions

Loku Stool – designed by Shin Azumi

To prolong the life of the product and retain its appearance and functionality, we would like to give you some relevant information and care advice:-

This unit is manufactured from oak or walnut veneer with either a tubular or composite base. It also comes in two heights, bar or counter.

Craftsmen manufacture this product and there is variety between each unit. This is because wood is a natural product, with natural colour and grain variations.

Natural timber is affected by sunlight; this can cause the wood colour to darken. For this reason (especially if placed in direct sunlight) it is recommended that placing objects in the same position for long periods of time is avoided. This potential colour adjustment becomes less relevant as the product ages.

It is recommended that no abrasive cleaners or solvents are used to clean the unit. Please only use proprietary furniture polishes or alternatively, warm water with a diluted mild detergent.

We thank you for purchasing this product and wish you many years of enjoyable and functional use.
