

Loku Stool by Shin Azumi

## Loku Stool by Shin Azumi

Shin Azumi created the Loku Range making good use of the efficient methods of advanced 3D veneer technology, which allows the seat to be moulded into more complex forms, making the visually and physically light shell comfortable, supportive and robust.

The moulded seat and back is made from a thin plywood veneer that can be shaped when heated into tight curves to stiffen the material.

The Loku Stool has a wood and metal base, and is available in oak or walnut plywood and in 2 height options.

The stool was designed for both commercial and residential use providing variations to accommodate the different uses.

Made in Thailand.

The Loku Range won the Design Guild Mark Award in 2016.

### Key Features

Suitable for contract use  
Replaceable components

### Technical / Construction

3D plywood seat  
Wood and metal base  
Fully assembled

### Dimensions

Counter Stool

H965 W447 D460 | Seat H650
