Our team of master craftsmen use authentic handcrafting techniques and machinery in the manufacturing process. Working with loose and soft fillings in upholstery naturally creates slight variations in the dimensions, which is why we work to a tolerance of up to 3cm.

At times, delays can occur when upholstering a bespoke piece of furniture. These delays may arise from factors such as material availability, design adjustments, and unexpected challenges encountered during the upholstery process. Rest assured, we are committed to delivering exceptional results and will keep you informed every step of the way. Your patience will be rewarded with a truly remarkable and personalised piece of upholstered furniture.

Remember that surfaces might not be completely smooth. Instead, they will have shapely textures that represent the natural characteristics of high-end upholstery materials like foam, feathers, Dacron, fibre, and more...

We create unique and original pieces, and we can also bring your design ideas to life based on inspiration images you provide. If you want a 1:1 replica, we would need the original piece in our workshop to disassemble and study its construction techniques. However, since that's usually not possible, our experienced upholsterers use their expertise to guide the construction and design decisions for you.

Fabrics are often made from natural fibres, such as cotton, wool, and silk, or synthetic fibres, such as polyester, nylon, and acrylic. These fibres can vary in texture, strength, and colour, which can affect the final appearance of the fabric and make it challenging to predict how it will behave when used for upholstery.

Our team consists of experts with decades of experience in their respective fields. When they make a bespoke piece, it's an exciting opportunity for them to bring something new to life for the first time. But remember every bespoke piece we create is essentially a prototype.

Bespoke upholstery is akin to art, where each piece is truly one-of-a-kind. Handmade upholstery exhibits a delightful subtle inconsistency, with each piece being ever-so-slightly different. This uniqueness arises from the distinct characteristics of the materials used and the organic nature of the upholstery process. Embracing these variations adds to the beauty and charm of each individual piece, making it a truly special creation.

In handmade upholstery, seams and joints may not always be perfectly straight. This is because of the natural variations in materials, the limitations of hand-sewing techniques, and the organic nature of the upholstery process. These factors can lead to slight variations in tension and positioning of the fabric. These unique imperfections contribute to the charm and character of your handmade piece, showcasing its authentic craftsmanship.

Slight variations in angles and curves can occur between the initial drawing and the final piece. These differences arise from the intricate manipulation of foam and fillings, as well as the tension in the fabric or leather. Embrace these organic nuances that add bespoke charm and a touch of beauty to each unique piece of upholstered furniture, showcasing exceptional craftsmanship.

Whilst making your bespoke furniture, our master upholsterers will always make the choice which results in the highest quality furniture on your behalf. Along the way, there will be construction choices to make to achieve the desired design and a durable construction, sometimes these can result in small changes to the design.

In CAD drawings, there are no actual upholstery techniques portrayed in the material sections, for the fabrication and sewing techniques, and the textures outside of the upholstery sections. These files may serve as a starting point for the making of a bespoke piece, but will not be exact representations of the finished product. During the making of the bespoke piece, we aim to create the most accurate and true reproduction of the design possible. Small variances might occur, and there could be some differences in the final rendering.

WHAT TO EXPECT WHEN ORDERING BESPOKE UPHOLSTERY

**CAD DRAWINGS ARE A HELPFUL GUIDE**

While CAD drawings are useful guides, they may not capture the exact characteristics of the physical materials used. This is because of the limitations of 2D digital models in representing the tactile qualities of materials and the limitations of hand-sewing techniques.

**SOFT FILLINGS AND ORGANIC UPHOLSTERY PROCESS**

During construction, the inherent variations in the natural materials being used may result in slight deviations from the expected variations. These variations arise from the natural characteristics of the materials used and the organic nature of the upholstery process, showcasing its authentic craftsmanship.

**ALWAYS AN ORIGINAL PIECE**

Every piece we produce is unique and original, making it a truly bespoke creation. While CAD drawings are a helpful guide, they may not fully capture the final tactile qualities of the physical materials used. This is because of the limitations of 2D digital models in representing the tactile qualities of materials and the limitations of hand-sewing techniques.

**SHAPELY SURFACES**

In handmade upholstery, seams and joints may not always be perfectly straight. This is because of the natural variations in materials, the limitations of hand-sewing techniques, and the organic nature of the upholstery process. These factors can lead to slight variations in tension and positioning of the fabric. These unique imperfections contribute to the charm and character of your handmade piece, showcasing its authentic craftsmanship.

**MAKING A BESPOKE PIECE FOR THE FIRST TIME**

Every piece we produce is unique and original, making it a truly bespoke creation. While CAD drawings are a helpful guide, they may not fully capture the final tactile qualities of the physical materials used. This is because of the limitations of 2D digital models in representing the tactile qualities of materials and the limitations of hand-sewing techniques.

**CHALLENGES IN TEXTURE AND BEHAVIOUR**

In handmade upholstery, seams and joints may not always be perfectly straight. This is because of the natural variations in materials, the limitations of hand-sewing techniques, and the organic nature of the upholstery process. These factors can lead to slight variations in tension and positioning of the fabric. These unique imperfections contribute to the charm and character of your handmade piece, showcasing its authentic craftsmanship.

**EVERY PIECE IS UNIQUE**

Every piece we produce is unique and original, making it a truly bespoke creation. While CAD drawings are a helpful guide, they may not fully capture the final tactile qualities of the physical materials used. This is because of the limitations of 2D digital models in representing the tactile qualities of materials and the limitations of hand-sewing techniques.

**HANDMADE CHARM AND CHARACTER**

In handmade upholstery, seams and joints may not always be perfectly straight. This is because of the natural variations in materials, the limitations of hand-sewing techniques, and the organic nature of the upholstery process. These factors can lead to slight variations in tension and positioning of the fabric. These unique imperfections contribute to the charm and character of your handmade piece, showcasing its authentic craftsmanship.

**ENSURING QUALITY AND DESIGN INTEGRITY**

While making your bespoke furniture, our master upholsterers will always make the choice which results in the highest quality furniture on your behalf. Along the way, there will be construction choices to make to achieve the desired design and a durable construction, sometimes these can result in small changes to the design.

**FOAM MANIPULATION AND FABRIC TENSION**

Light variations in angles and curves can occur between the initial drawing and the final piece. These deviations arise from the intricate manipulation of foam and fillings, as well as the tension in the fabric or leather. Embrace these organic nuances that add bespoke charm and a touch of beauty to each unique piece of upholstered furniture, showcasing exceptional craftsmanship.

**FACTORS AFFECTING MANUFACTURING TIMES**

4 times, always use a soft upholstery, intricate pieces of foam must. These designs may not be the first function, such as material availability, design adjustments, and unexpected challenges encountered during the upholstery process. Rest assured, we are committed to delivering exceptional results and will keep you informed every step of the way. Your patience will be rewarded with a truly remarkable and personalised piece of upholstered furniture.
