

Flow Chair

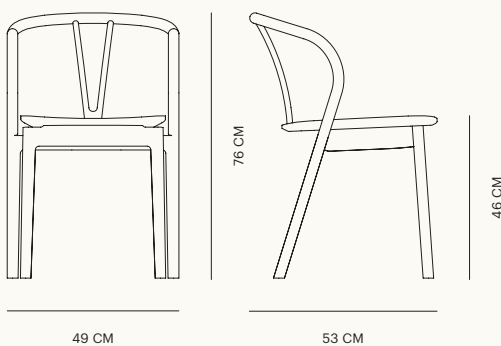

Designed by Tomoko Azumi

2015

Taking its name from the fluid, sweeping lines produced by steam-bent timber, the FLOW CHAIR was born out of a collaboration with Japanese designer, Tomoko Azumi. Designed in 2015, the FLOW CHAIR exemplifies the warm elegance of contemporary Japanese design, subtly revealing its essence through soft, emotive cues.

With sinuous, tapered legs built to stack easily when not in use, the chair balances function and beauty in a harmonious, graceful form. Manufactured in solid Ash timber, the FLOW CHAIR is offered in nine bespoke finishes and is now available with an upholstered seat, in a variety of harmonious textiles and colour-palettes.
