

FRITZ HANSEN

DROP™
PRODUCT FACT SHEET

DROP™

The Drop™ chair draws inspiration from the feeling of an embrace, but it has also been designed for freedom of movement; creating a unique sense of comfort. Designed by Arne Jacobsen, it was originally created for the SAS Royal Hotel in Copenhagen before being relaunched in 2014. It is said to be Jacobsen's favourite chair among his many designs.

ABOUT THE DESIGNER

The collaboration between Arne Jacobsen and Fritz Hansen dates back to 1934. It was not until 1952 however that the team got its breakthrough with the Ant™. It was succeeded by Series 7™ in 1955, thereby enabling both Jacobsen and Fritz Hansen to write their names into furniture history.

PRODUCTION PROCESS

Shell: The shell is made of ABS plastic with nylon as reinforcement inside. The outer shell components are glued together with ABS glue and the inner parts with MS Polymer glue.

Upholstery: The shell is padded with polyurethane (PUR) foam. A water-soluble glue is used for bonding of textile to the foam.

Base: The bases are made of chromed steel or powder coated steel. Fritz Hansen uses both trivalent chromium (Cr3) and hexavalent chromium (Cr6) for chromium plating. Fritz Hansen will convert to solely using trivalent chromium (Cr3) when the capacity in the Industry allows it.

Seat cushion: Made of HR foam or CMHR foam and upholstered with textile.
